

Nahant Alternative Energy Committee

Meeting Agenda for Thursday, November 14, 2013

1. Approval of Minutes of last meeting
2. Status of our proposal to develop a solar hot water heater for the use of swimmers at the Life Saving Station.
3. Latest on LWS wind turbine construction.
4. Latest on advisability of including a listing of companies in local area who could provide and/ or install geothermal systems. At the last meeting the committee voted to approve the use of such a listing, since we wanted to enlighten the public in the event they wanted to pursue their energy needs further. Review this with Matt Dam to see if he will add this to his report to the town.
5. At our last meeting Jim Callahan pointed out that we should look into wind turbines on the Kelley Greens. The Committee agreed. Let's explore the type of wind turbine, cost, and where town might use the power. Please review your copy of Jim's proposal.
6. New business (Recommendations for our 6th and 7th Committee member?)
7. Discussion of ethics test that each of us must take for the state.
8. Visitors
9. Adjourn

Meeting time: Thursday, November 14, 2013 at 7:30pm

Meeting place: Town Hall basement in one of two rooms facing the Nahant Library
