- 5) **Planning Context:** Is the project part of a general Town planning study (e.g. Open Space and Recreational Plan, Master Plan etc.)? If so, when was the plan prepared and who has approved the plan?

- Is part of a Program Plan prepared on _____ and approved by _____

Grant Application (cont.):

6) Evaluation Criteria: Provide a brief description of how this project meets as many of the selection criteria as may be applicable. Refer to Selection Criteria attached as Appendix A (Page 10).

The current cedar shingle siding is cupping, rotting and missing in some areas, and the windows need to be re-flashed to prevent leaking. This is very time sensitive because it will continue to get worse if it is not fixed appropriately. We do not currently have any other funds to support this project.

7) Estimated Cost and Schedule:

Attach cost estimates for construction projects and state how costs were derived.

11) Project Priority: If you are submitting applications for more than one project, indicate the priority of this project recognizing that your most important project may not be needed or be ready for action until two or three years from now.

We are submitting applications for three projects, and this project is our #2 priority

12) Time Sensitivity: Describe any time sensitive critical issues that may impact the ability to protect the resource or otherwise impact schedule and/or grant making decisions.

This project is extremely time sensitive, as the longer we wait, the more damage is being done.

13) Contingency Planning: What are the consequences if CPA funding is not available for the current fiscal year? Describe alternate plans for temporary stabilization, long term solution.

We do not currently have any other funding for a large project like this, which means deterioration will continue to get worse.
